ATLAS OF ESSENTIAL WILDLIFE HABITATS FOR MAINE'S ENDANGERED AND THREATENED SPECIES

2000 Edition
Valid through December 31, 2000

This Atlas contains reduced copies of all Essential Wildlife Habitat maps currently adopted for Maine. It is intended to serve as a convenient reference and guide. Full-size copies of maps are located in the appropriate town, DIFW, DEP, DMR, and LURC offices, and should always be consulted when the most accurate information is needed. These Essential Wildlife Habitat maps are for use only with Maine's Endangered Species laws and regulations (12 MRSA and Chapter 8.05). Locations of other Endangered Species habitats, Significant Wildlife Habitats, rare plants and natural communities, or other important natural resources are not included.

INTRODUCTION

Maine's fish and wildlife are a valuable public resource, yet some species are in danger of becoming extinct within the State. The Maine Legislature recognized this by passing the Maine Endangered Species Act (12 MRSA, Chapter 713, subchapter V) in 1975. The Act (Appendix A) includes provisions authorizing the Commissioner of the Maine Department of Inland Fisheries and Wildlife (DIFW) to designate "Essential Habitat" for species listed as Endangered or Threatened (Appendix B), and to develop protection guidelines for these areas.

Essential Wildlife Habitats are "areas currently or historically providing physical or biological features essential to the conservation of an Endangered or Threatened Species in Maine and which may require special management considerations". As required under the Maine Endangered Species Act, **a state agency or municipal government shall not permit, license, fund, or carry out projects that will significantly alter an Essential Habitat or violate protection guidelines adopted for the habitat.** Activities of private landowners are not affected by this law unless they require a state or municipal permit or license, or are funded or carried out by a state agency or municipality.

To date, Essential Habitats have been designated for the Bald Eagle, Roseate Tern, Piping Plover and Least Tern (Appendix C). Additional listed species may receive attention in the future. Criteria for designating sites as Essential Habitat, protection guidelines listing the types of projects which must be reviewed by the Department, and factors considered during DIFW project evaluations are adopted in Inland Fisheries and Wildlife Rules (Chapter 8.05). These Essential Habitat Rules are printed in their entirety beginning on page 4.

Examples of projects requiring DIFW evaluation when occurring within a designated Essential Habitat include:

- subdivision of land
- construction or alteration of buildings, waste-water systems, or utilities
- conversion of seasonal dwellings to year round
- exemption to minimum lot size requirements
- construction or relocations of roads
- exploration or extraction of minerals
- alteration to wetlands, submerged bottomlands, or shoreland zones
- installation of docks, moorings, or aquaculture facilities

Examples of projects that are **exempt** from DIFW evaluation include:

- emergency repairs to existing structures and utilities
- emergency activities necessary for public health and safety
- interior repairs and construction
- any project not requiring a permit or license from, or funded or carried out by, a state agency or municipality

Landowners, project planners, municipalities or state agencies considering a project in or near an Essential Habitat should immediately contact a DIFW Regional Wildlife Biologist (Figure 1) for assistance. **Early consultations will help to minimize or avoid any potential conflicts that might otherwise arise during the final project review, and will facilitate cooperation between all parties.** A project must not significantly alter an Essential Habitat or violate protection guidelines. If it will, the state agency or municipal government may not issue a permit or license for the project.

This Atlas contains reduced copies of all Essential Wildlife Habitat maps currently adopted for Maine. It is valid through December 31, 2000 and is intended to serve as a convenient reference and guide. **(An index to the maps by township name can be found on page 17.)** Full-size copies of maps are located in the appropriate municipal, DIFW, Department of Environmental Protection (DEP), Land Use Regulation Commission (LURC), and Department of Marine Resources (DMR) offices, and should always be consulted when the most accurate information is needed. **Essential Habitat maps may be revised annually**, and users should be certain the most recent version of the Atlas or any individual map is consulted. A list of all Essential Wildlife Habitat maps and their effective dates current through December 31, 2000 is included in Appendix D.

If a project falls partly or wholly within a designated Essential Habitat and it requires a permit or license from, or is carried out or funded by a state or municipal government, it must be evaluated by the DIFW before a decision can be issued. A request for evaluation is initiated when the town or state agency reviewing or proposing the project submits a "Request For Project Evaluation" (DIFW Form EHR5/95) with the required attachments. A copy of this form (which may be reproduced) and instructions for completing it are included in this Atlas.

The Essential Wildlife Habitat maps in this Atlas are intended for use only with Maine's Endangered Species laws and regulations (12 MRSA and Chapter 8.05). Locations of other Endangered Species habitats, Significant Wildlife Habitats, rare plants and natural communities, or other important natural resources are not included. Information about these other resources can be obtained by contacting the following agencies:

INLAND FISHERIES AND WILDLIFE RULES**

Chapter 8.05 Essential Habitat for Species Designated as Endangered or Threatened.

The following areas, identified as currently or historically providing physical or biological features essential to the conservation of an Endangered or Threatened Species and requiring special management considerations, and the management guidelines for the protection of these areas, are adopted in accordance with the provisions of Title 12, §§7754 (2,3) and 7755-A (1,2,3). The Commissioner has identified and mapped such habitats as depicted on the maps entitled "Essential Habitat For Endangered And Threatened Species" which are incorporated herein.

A. Bald Eagle Nest Site

1. Purpose

To provide special protection to maintain breeding habitat and to prevent disturbance which may cause nesting failure of bald eagles. Protection is focused on the nest site.

2. Definitions

When used in this section, the following words and terms shall have the following meaning:

- a. **Nesting area.** "Nesting area" means a locality containing one or more nest sites and that has been used by a pair of nesting bald eagles.
- b. **Occupied.** "Occupied" means the presence of one or a pair of adult eagles, eagle eggs, or eagle chicks any time between March 1 - July 15.
- c. **Project.** "Project" means a planned undertaking, newly initiated or reinitiated.

3. Designation Criteria

Bald eagle nest sites identified and mapped by the Commissioner of Inland Fisheries and Wildlife as Essential Habitat must be within a nesting area occupied in at least one of the three most recent years and have either a nest that has existed for two consecutive years, or the only existing nest in that nesting area. Bald eagle nest sites designated as Essential Habitat will be deleted as follows:

- a. All nest sites in the nesting area will be deleted if a nesting area has not been occupied, as defined, at any time during the most recent five years.
- b. An individual nest site within an active nesting area will be deleted if a nest structure has not existed at any time during the most recent five years or the Commissioner determines that the site is no longer suitable nesting habitat.

4. Protection Guidelines

a. Projects Prohibited Without the Commissioner's Approval

Any project requiring a permit or license from, or to be funded or carried out by, a state agency or municipal government partly or wholly within a bald eagle nest site designated as Essential Habitat shall not be permitted, licensed, funded, or carried out unless the Commissioner determines that the activity will not significantly alter or unreasonably harm the essential nesting habitat. Projects that may be affected include, but are not limited to: subdivision of land or buildings; construction, installation, expansion, alteration or repair of permanent structures; agricultural management; mineral exploration and extraction; forest management; road projects and construction; shoreland alteration; utility construction; water crossing; water impoundment; aquaculture; conversion of seasonal dwelling; installation of subsurface wastewater disposal system; and issuance of an exemption of the minimum lot size requirement.

b. Exemptions

The following activities are exempted from the requirements of this paragraph.

- 1) Projects limited to repairs, maintenance and alterations to the interior of an existing structure.
- 2) Emergency repairs to existing structures and utilities which due to unforeseen circumstances require immediate action.
- 3) Emergency activities which due to unforeseen circumstances require immediate action for public health or safety.
- 4) Licenses and permits to operate or occupy a completed project.
- 5) Projects that address the protection of the Essential Habitat and the Endangered and Threatened Species and are conducted as part of a Department Wildlife Management Area Plan or Species Management Plan, or a Land Use Regulation Commission Resource Protection Plan (P-RP) to which the Department is a party, provided that the parties of the agreement perform according to its terms.

5. Significant Alteration of Habitat

In determining whether a project significantly alters or unreasonably harms essential nesting habitat, the following factors will be considered:

- a. Magnitude and time of year of noise and human activity generated by the project.
- b. Physical alteration to the landscape.
- c. Destruction of or alteration to key habitat components such as perch trees, roost trees, and foraging areas.

- d. Reduction in the seclusion of the nest site and adjacent shoreland area.
- e. Demonstrated tolerance of the particular eagles to human activity and disturbance.
- f. Reduction in the future suitability of the nest site to bald eagles.

B. Roseate Tern Nesting Area

1. Purpose

To provide special protection to maintain breeding habitat and to prevent disturbance which may cause nesting failure of roseate terns. Protection is focused on the nesting area.

2. Definitions

When used in this section, the following words and terms shall have the following meaning:

- a. **Nesting area.** "Nesting area" means a locality encompassing an island or portion of an island used by at least one pair of nesting roseate terns.
- b. **Nesting.** "Nesting" means the presence of one or more nests, eggs, chicks, or pairs of territorial adult terns between May 15 - August 15.
- c. **Project.** "Project" means a planned undertaking, newly initiated or reinitiated.

3. Designation Criteria

Roseate tern nesting areas identified and mapped by the Commissioner of Inland Fisheries and Wildlife as Essential Habitat must:

- a. Have a record of at least one pair of nesting roseate terns since 1930,
- b. Have suitable habitat as indicated by the presence of nesting common, arctic, or roseate terns in at least any 3 years since 1976, and
- c. Be considered essential to the achievement of the Department's management goals and objectives for roseate terns.

Roseate tern nesting areas designated as Essential Habitat will be deleted if:

- a. The nesting area has not been occupied by any nesting pairs of common terns, arctic terns, or roseate terns during the most recent 10 years, and the lack of occupancy is not related to predation or competition from other species, or to any human-related activity, or
- b. The nesting area is no longer considered essential to the achievement of the Department's management goals and objectives for roseate terns.

4. Protection Guidelines

a. Projects Prohibited Without the Commissioner's Approval

Any project requiring a permit or license from, or to be funded or carried out by, a state agency or municipal government partly or wholly within a roseate tern nesting area designated as Essential Habitat shall not be permitted, licensed, funded, or carried out unless the Commissioner determines that the activity will not significantly alter or unreasonably harm the Essential Habitat. Projects that may be affected include, but are not limited to: Subdivision of land or buildings; construction, installation, expansion, alteration or repair of permanent structures; agricultural management; mineral exploration and extraction; forest management; road projects and construction; shoreland alteration; utility construction; water crossing; water impoundment; dredging; aquaculture; conversion of seasonal dwelling; installation of subsurface wastewater disposal system; and issuance of an exemption of the minimum lot size requirement.

b. Exemptions

The following activities are exempted from the requirements of this paragraph.

- 1) Projects limited to repairs, maintenance and alterations to the interior of an existing structure.
- 2) Emergency repairs to existing structures and utilities which due to unforeseen circumstances require immediate action.
- 3) Emergency activities which due to unforeseen circumstances require immediate action for public health or safety.
- 4) Licenses and permits to operate or occupy a completed project.
- 5) Projects that address the protection of the Essential Habitat and the Endangered and Threatened Species and are conducted as part of a Department Wildlife Management Area Plan or Species Management Plan, or a Land Use Regulation Commission Resource Protection Plan (P-RP) to which the Department is a party, provided that the parties of the agreement perform according to its terms.

5. Significant Alteration of Habitat

In determining whether a project significantly alters or unreasonably harms essential nesting habitat, the following factors will be considered:

- a. Magnitude and time of year of noise and human activity generated by the project.
- b. Physical alteration to the landscape of the uplands, waters, and submerged lands.
- c. Destruction of or alteration to key habitat components such as island vegetation, nesting and roosting substrate, and foraging areas.
- d. Increase in disturbance by humans, and in predation or competition by other species.

- e. Demonstrated tolerance of terns at the site to human activity and disturbance.
- f. Reduction in the future suitability of the nesting area to nesting roseate terns.

C. Piping Plover And Least Tern Nesting, Feeding, And Brood-Rearing Areas

1. Purpose

The purpose of Essential Habitat designation for piping plovers and least terns is to: 1) provide special protection to maintain nesting, feeding, and brood-rearing habitats essential to the conservation of these species; and 2) minimize human-related disturbance that can cause nesting failure of these species. Protection is focused on the coastal wetlands and coastal sand dune systems used by nesting piping plovers or least terns.

This rule is not intended to, and shall not be interpreted to: 1) preclude rebuilding of existing structures in accordance with implementation of the coastal sand dune regulations (38 MRSA, Sect. 480-A (Q) and Chapter 355 of Department of Environmental Protection Rules), nor 2) preclude recreational uses in practice at the time an area was designated as Essential Habitat and that are otherwise allowed by law.

2. Definitions

When used in this section, the following words and terms shall have the following meaning:

- a. **Nesting.** "Nesting" means the presence of one or more nests, eggs or chicks of piping plovers or least terns.
- b. **Nesting, feeding, and brood-rearing area.** "Nesting, feeding, and brood-rearing area" means a locality encompassing portions of coastal wetlands and coastal sand dune systems (including subtidal, intertidal and beach and associated salt marshes and wetlands) used by at least one pair of nesting piping plovers or least terns.
- c. **Project.** "Project" means a planned undertaking, newly initiated or reinitiated.

3. Designation Criteria

Piping plover and least tern nesting, feeding, and brood-rearing areas identified and mapped by the Commissioner of Inland Fisheries and Wildlife (IF&W) as Essential Habitat must:

- a. Have a record of nesting by at least one pair of piping plovers or least terns since 1986, and
- b. Be considered essential to the achievement of the Department's management goals and objectives for piping plovers or least terns.

Piping plover and least tern nesting, feeding, and brood-rearing areas designated as Essential Habitat will be deleted if:

- a. The area has not been occupied by any nesting pairs of piping plovers or least terns during the most recent 10 years and the lack of occupancy is not related to predation or

competition from other species, or to any human-related activity; or

- b. The area is no longer considered essential to the achievement of the Department's management goals and objectives for piping plovers or least terns.

4. Interpretation of Essential Habitat Area Boundaries

The following guidelines shall be used to interpret mapped Essential Habitat boundaries:

- a. In shaded areas, boundary lines are delineated in greater detail on composite aerial photographs (see "Boundary Line Detail Photos For Piping Plover And Least Tern Essential Habitat", prepared in November, 1994). Copies of these photographs are available for viewing at town offices in affected municipalities; Maine Department of Inland Fisheries and Wildlife offices in Gray, Augusta, and Bangor; and Maine Department of Environmental Protection offices in Portland and Augusta; or they may be purchased from: Essential Habitat Maps, Wildlife Assessment Section, 650 State Street, Bangor, Maine 04401-5654.

Outside of shaded areas, the lines on the maps indicate the boundaries. Where a line is solid, the line on the map determines the boundary, and the inside of the line is the edge of the boundary. Where a line is dashed, the boundary is determined by the edge of the coastal wetlands as defined by 38 MRSA, Sect. 480-B. Cross-hatched areas are not part of the Essential Habitat.

- b. Where a boundary line follows a seawall or similar protective structure, only the beach area on the seaward side is intended to be included within the Essential Habitat: neither the seawall itself nor the property behind it are part of the Essential Habitat.

5. Protection Guidelines

- a. Projects Prohibited Without the Commissioner's Approval

Any project requiring a permit or license from, or to be funded or carried out by, a state agency or municipal government partly or wholly within a piping plover and least tern nesting, feeding, and brood-rearing area designated as Essential Habitat shall not be permitted, licensed, funded, or carried out unless the Commissioner determines that the project will not significantly alter the Essential Habitat.

Examples of projects that may be affected include, but are not limited to: subdivision of land or buildings; construction, installation, expansion, alteration or repair of permanent structures; mineral exploration and extraction; road projects and construction; dredging; bulldozing; removing or displacing soil, sand, vegetation, or other materials; draining or otherwise dewatering; filling, including adding sand or other material to a coastal sand dune; beach nourishment projects; dune restoration projects; utility construction; water crossing; water impoundment; aquaculture; installation of subsurface wastewater disposal system; and issuance of an exemption to the minimum lot size requirement.

Projects located wholly outside an area designated as Essential Habitat, regardless of whether some other portion of the lot or parcel of land is within the Essential Habitat, are not affected by this rule.

Licensed activities which are not considered projects and therefore are not affected by this rule include, but are not limited to: recreational hunting and fishing, shellfish harvesting, sulky driving, dog ownership, and motor vehicle and boat operation.

b. Exemptions

Within areas designated as Essential Habitat, the following projects are exempted from the requirements of this paragraph:

- 1) Emergency repairs to existing utilities and structures, including roads and seawalls that, due to unforeseen circumstances, require immediate action and do not require a coastal sand dune permit under 38 MRSA, Section 480-A, Q.
- 2) Emergency activities that, due to unforeseen circumstances, require immediate action for public health or safety.
- 3) Licenses and permits to operate or occupy a completed project.
- 4) Projects limited to repairs, maintenance, and alterations to the interior of an existing structure.
- 5) Projects that address the protection of the Essential Habitat and the Endangered or Threatened Species and are conducted as part of a Department Management Area Plan or Species Management Plan, or a Land Use Regulation Commission Resource Protection Plan (P-RP) to which the Department is a party, provided that the parties of the agreement perform according to its terms.
- 6) Municipal licenses or permits for a project for which the Department, through another permitting process, has already found no significant alteration of the habitat or violation of protection guidelines for the Essential Habitat as currently mapped.

c. Review Process

For projects located partly or wholly within Essential Habitat as defined by 12 MRSA, §7754 and this chapter, it is the responsibility of the state agency or municipality considering the permit or license application, or funding or carrying out the project, to obtain the Department's review. Forms entitled "Request For Project Evaluation" will be provided by the Department. Upon receiving a Request For Project Evaluation, the Department will provide an evaluation of whether the project would significantly alter the Essential Habitat or violate the Department protection guidelines as set forth in 12 MRSA, §7755-A(1). If the proposed project will significantly alter Essential Habitat or violate the protection guidelines, and if a variance is sought, the Commissioner will determine whether a certification of no significant risk to the population, as described in 12 MRSA, §7755-A(2) can be issued.

6. Significant Alteration of Habitat

In determining whether a project significantly alters essential nesting, feeding, and brood-rearing habitat for piping plovers and least terns, the following factors will be considered:

- a. Magnitude and time of year of noise and human activity generated by the project;
- b. Within the area designated as Essential Habitat, destruction, alteration, or degradation of a portion of a coastal wetlands or coastal sand dune system (including subtidal, intertidal and beach and associated salt marshes and wetlands) which will adversely affect the Essential Habitat;

- c. Increase in disturbance by humans and their pets, or increased predation (or attraction of predators) or competition from other species; and
- d. Reduction in the future suitability of the nesting, feeding, and brood-rearing habitat for piping plovers and least terns.

AUTHORITY: Title 12, MRSA, Sections 7035, 7753, 7754

REVIEW PROCESS FOR PROJECTS THAT MAY BE AFFECTED BY ESSENTIAL HABITAT RULE

These are the steps a municipality or state agency must take to address **Essential Habitat** concerns when reviewing or proposing projects within their jurisdiction.

1. **DETERMINE IF THE PROPOSED PROJECT IS IN OR NEAR AN ESSENTIAL HABITAT.**

Consult the official Essential Habitat maps. Reduced copies of these maps and an index by town name are included in this Atlas. Please contact the DIFW Regional Wildlife Biologist (Figure 1) if you need assistance verifying a project location relative to an Essential Habitat. If the proposed project is located partly or wholly within an Essential Habitat, go on to Steps 2-3. If the proposed project is clearly outside an Essential Habitat, these regulations and review procedures do **not** apply.

2. **CONSULT WITH THE DIFW REGIONAL WILDLIFE BIOLOGIST.**

Encourage the applicant to obtain DIFW guidance during project planning and design. Municipalities and state agencies should request assistance from the Regional Wildlife Biologist during initial project reviews and **before** seeking final DIFW evaluation. Early involvement of the DIFW will help to minimize or avoid any potential conflicts, and facilitate cooperation between all parties.

3. **SUBMIT A "REQUEST FOR PROJECT EVALUATION" TO THE DIFW.**

If the project meets municipal or state review standards and is recommended for approval by the town or state, an evaluation of the **final** proposal must be obtained from the DIFW before a decision can be issued. Town or state officials request an evaluation by submitting a "Request for Project Evaluation" (DIFW Form EHR5/95) with the required attachments provided by the applicant. A copy of this form and instructions for completing it are included in this Atlas.

The DIFW will evaluate the final project proposal according to review standards established for Essential Habitats, and determine if the project would significantly alter the habitat or violate protection guidelines. Site visits and discussions with the project applicant will be necessary if they have not previously occurred.

The DIFW will notify the town or state agency of the results of its evaluation. The town or state agency issues a decision based on the Department's evaluation and notifies the project applicant.

INSTRUCTIONS FOR COMPLETING FORM EHR5/95

"REQUEST FOR PROJECT EVALUATION" ESSENTIAL HABITATS OF ENDANGERED AND THREATENED SPECIES

Formal DIFW review of projects proposed within Essential Habitats is initiated upon submission of a **"Request For Project Evaluation"** (Form EHR5/95) by a state agency or municipality. Both the project applicant and the agency or municipal official reviewing the project must provide information on the form.

Please read the following instructions carefully before completing a request form. Contact the DIFW Regional Wildlife Biologist if you have questions or require assistance.

1. **Please type or print.** Illegible or incomplete forms will be returned.
2. The **project applicant**¹ must complete **Section A** and provide the reviewing agency or municipality with **3 copies** of the following items:
 - a. a photocopy of that portion of the official DIFW Essential Habitat map that denotes the affected Essential Habitat and clearly shows project boundaries; and
 - b. a copy of the **final** project application, permit, and/or license as recommended for approval by the town or state. If none of these items exist for the project, a site map must be provided (scale: 1" = 200').

Additional project documentation is generally not required but, if included, may enable a more rapid review by the Department.

3. An appropriate **representative of the state agency or municipality** reviewing or proposing the project must complete **Section B** and ensure that all information and attachments required from the applicant are provided.

¹In cases where a state agency or municipality is proposing to fund or carry out a project within an Essential Habitat, the agency or municipality is considered the project applicant.

4. The completed form and all attachments should be sent to:

**ATTN: ESSENTIAL HABITAT REVIEW
Maine Department of Inland Fisheries and Wildlife
c/o Environmental Coordinator
284 State Street, State House Station #41
Augusta, Maine 04333**

5. The reviewing agency or municipality and the project applicant should each retain a copy of the completed form and all attachments. This will facilitate response to any additional inquiries from DIFW staff during the project evaluation.

The completed "Request For Project Evaluation" and all attachments will be retained on file by the DIFW and referenced to ensure that approved projects are carried out as described. **Projects that deviate from information provided on the form may be referred to the State Attorney General's Office as possible violations of the Maine Endangered Species Act.**

**ADDITIONAL COPIES OF THE "REQUEST FOR PROJECT EVALUATION" (FORM EHR5/95)
ARE AVAILABLE FROM ALL DIFW OFFICES**

REQUEST FOR PROJECT EVALUATION

ESSENTIAL HABITATS OF ENDANGERED AND THREATENED SPECIES MAINE DEPARTMENT OF INLAND FISHERIES AND WILDLIFE

DIRECTIONS: Please type or print; illegible or incomplete forms will be returned. Send this request and attachments to:

ATTN: ESSENTIAL HABITAT REVIEW

SECTION A (to be completed by project applicant)

1. Name of project applicant: _____
Mailing address: _____ Telephone: _____
 2. Name of property owner: _____
Mailing address: _____ Telephone: _____
 3. Project location: Town Tax Map # _____ Lot # _____
Township: _____ County: _____
 4. Are permit(s) or license(s) required for this project? _____yes
_____no. If yes, please list: _____
 5. Attachments. The following items must be sent in triplicate with this form:
 - a. a photocopy of that portion of the official DIFW map that denotes the affected Essential Habitat and clearly shows project boundaries (maps are available in all DIFW offices, offices of affected towns, and most DEP, LURC, and DMR offices; **and**
 - b. a copy of the **final** project application, permit, and/or license as recommended for approval; if none of these items exist for the project, the applicant must provide a site map (scale: 1" = 200')
- Additional project documentation is generally not required but, if included, may enable a more rapid review by the DIFW.
6. Are any of the following activities associated with the project?
 - a. subdivision plan or residential development? _____no _____yes
 - b. exterior construction or repair of buildings? _____no _____yes
 - c. road or trail construction or maintenance? _____no _____yes
 - d. recreational activities? _____no _____yes
 - e. alteration of soils or vegetation? _____no _____yes
 - f. timber harvests or forest management? _____no _____yes
 - g. agriculture or agricultural management? _____no _____yes
 - h. alterations to wetlands, open waters, submerged lands, dunes, islands, or alpine areas? _____no _____yes
 - i. modifications to shoreland zones (uplands within 250 feet of any wetland or water body)? _____no _____yes

Section A (continued)

7. Briefly describe the nature and extent of project activities. Address each item answered by a "yes" in the previous question and provide details of those activities proposed within the Essential Habitat. (If additional space is needed, complete on a separate page and attach to this form.): _____

8. What are the starting and ending dates of the project? If applicable, give dates for on-site planning, construction, and operational phases. _____

9. Please summarize and attach any additional facts regarding this project you wish to bring to the attention of the DIFW.

10. I certify that the information described within this form is complete and accurate to the best of my knowledge and belief.

Signature: _____ Date: _____

SECTION B (to be completed by agency or municipal representative)

1. Name of agency/municipality: _____
Mailing address: _____

Contact individual: _____
Title: _____ Telephone: _____

2. This agency/municipality finds the project described herein meets our criteria for approval, but is partly or wholly within a designated Essential Habitat. I hereby request evaluation by the DIFW to determine if the project would significantly alter the Essential Habitat or violate protection guidelines adopted for the habitat.

Signature: _____ Date: _____

ESSENTIAL WILDLIFE HABITAT MAPS FOR MAINE'S ENDANGERED AND THREATENED SPECIES

These maps are true and correct copies (reduced) of the official maps showing Essential Wildlife Habitats designated for species listed as Endangered or Threatened by the Maine Department of Inland Fisheries and Wildlife. Full-size copies are located in the appropriate town, DIFW, DEP, DMR, and LURC offices, and should always be consulted when the most accurate information is needed. *Boundary Line Detail Photos For Piping Plover And Least Tern Essential Habitats*, which delineate in greater detail the boundaries within shaded areas on some of the maps, are not included in this Atlas. Copies of these photographs are available for viewing at town offices in affected municipalities; DIFW offices in Gray, Augusta, and Bangor; and Department of Environmental Protection offices in Portland and Augusta; or they may be purchased from: Essential Habitat Maps, Wildlife Resource Assessment Section, Maine Department of Inland Fisheries and Wildlife, 650 State Street, Bangor, ME 04401-5654. These maps and photos are for use only with Maine's Endangered Species laws and regulations (12 MRSA and Chapter 8.05). Locations of other Endangered Species habitats, Significant Wildlife Habitats, rare plants and natural communities, or other important natural resources are not included.

Essential Habitat maps may be updated annually. Users should be certain the most recent version of the Atlas or any individual map is consulted. A list of all Essential Habitat maps and their current effective dates can be found in Appendix D. **This Atlas is valid only through December 31, 2000.**

MAP LEGEND

BE 000A Bald Eagle (BE) Nest Site # 000A

All boundaries are shown as a solid circular line (○) and the inside of the line is the edge of the boundary. Each circle has a radius of approximately 1,320 feet and a center located approximately on the nest. The line on the map determines the boundary. The area within each circle is approximately 126 acres.

RT 000 Roseate Tern (RT) Nesting Area # 000

All boundaries are shown as a solid line and the inside of the line is the edge of the boundary. The boundary line is located approximately 1,320 feet from the low tide edge of the nesting island or approximately 1,320 feet from the portion of the island used for nesting. The line on the map determines the boundary.

MAP LEGEND (continued)

PPLT 00 Piping Plover And Least Tern (PPLT) Nesting, Feeding, And Brood-Rearing Area # 00

Essential Habitat within the boundary line depicted on the map encompasses portions of the coastal sand dune system and associated coastal wetlands. Where the area is shaded, boundary lines are delineated in more detail on composite aerial photographs entitled "*Boundary Line Detail Photos For Piping Plover And Least Tern Essential Habitats*", taken in 1986 and prepared in November, 1994 and February, 1997 (see preceding page for information on access to these photos). **For the exact location of a boundary line within the shaded area of a Piping Plover and Least Tern Essential Habitat, refer to the following photograph(s):**

<u>Area #</u>	<u>Photo #(s)</u>	<u>Preparation Date</u>
PPLT 01	PPLT01	11/94
PPLT 02	PPLT02a, PPLT02b	11/94
PPLT 03	PPLT03a, PPLT03b	11/94
PPLT 04	PPLT04a, PPLT04b, PPLT04c	2/97(a), 11/94(b,c)
PPLT 05	PPLT05	11/94
PPLT 08	PPLT08	11/94
PPLT 09	PPLT09	11/94
PPLT11	PPLT11	2/97
PPLT12	PPLT12a, PPLT12b	2/97

Outside of shaded areas, where the line is solid, the line on the map determines the boundary and the inside of the line is the edge of the boundary. Where the line is dashed, the boundary is determined by the edge of the coastal wetlands as defined by 38 MRSA, Section 480-B. Cross-hatched areas are not part of the Essential Habitat.

DEPTH CURVES AND SOUNDINGS IN FEET-DATUM IS MEAN LOW WATER
THE RELATIONSHIP BETWEEN THE TWO DATUMS IS VARIABLE
SHORELINE SHOWN REPRESENTS THE APPROXIMATE LINE OF MEAN HIGH WATER
THE MEAN RANGE OF TIDE IS APPROXIMATELY 9.7 FEET
THIS MAP COMPLIES WITH NATIONAL MAP ACCURACY STANDARDS
FOR SALE BY U. S. GEOLOGICAL SURVEY, RESTON, VIRGINIA 22092
A FOLDER DESCRIBING TOPOGRAPHIC MAPS AND SYMBOLS IS AVAILABLE ON REQUEST

ROAD CLASSIFICATION	
Primary highway, hard surface	Light duty road, hard or improved surface
Secondary highway, hard surface	Unimproved road
Interstate Route	U. S. Route

BAKER ISLAND, MAINE
44068-82-TF-024

1983

effective 10/1/99

Mapped, edited, and published by the Geological Survey
Control by USGS and NOS/NOAA
Topography by photogrammetric methods from aerial photographs
taken 1976. Field checked 1977. Map edited 1982
Selected hydrographic data compiled from NOS chart 13318 (1981)
This information is not intended for navigational purposes
Projection and 10,000-foot grid ticks: Maine coordinate
system, east zone (Transverse Mercator). 1000-meter Universal
Transverse Mercator grid, zone 19. 1987 North American Datum
To place on the predicted North American Datum 1983 move the
projection lines 1 meter south and 47 meters west as shown by
dashed corner ticks
Red tint indicates area in which only landmark buildings are shown
There may be private inholdings within the boundaries of
the National or State reservations shown on this map

BATH QUADRANGLE
MAINE
7.5 MINUTE SERIES (TOPOGRAPHIC)
NEW BATH 1:250,000 QUADRANGLE

Maped, edited, and published by the Geological Survey
Control by USGS, NOS/NOAA, USACE, and Maine Geologic Survey
Topography by photogrammetric methods from aerial photographs
taken 1972 and 1973. Field checked 1974. Map edited 1980
Selected hydrographic data compiled from NOS charts 13290 (1979) and
13283 (1974). This information is not intended for
navigational purposes
Projection and 10,000-foot grid (U.S. Maine coordinate
system, west zone Transverse Mercator)
1000-meter Universal Transverse Mercator grid, zone 19
1827 North American Datum
To place on the predicted North American Datum 1983
move the projection line 4 meters south and
42 meters west as shown by dashed corner ticks
Red tint indicates area in which only benchmark buildings are shown
There may be private holdings within the boundaries of
the National or State reservations shown on this map

ROAD CLASSIFICATION
Primary highway ————— Light-duty road, hard or
hard surface ————— improved surface
Secondary highway ————— Unimproved road
hard surface —————
Interstate Route ————— U.S. Route State Route

effective 10/1/99

Map by the U. S. Coast and Geodetic Survey
Edited and published by the Geological Survey
Control by USC&GS

Topography by plane-table surveys and
from aerial photographs by multiplex methods
Aerial photographs taken 1944. Field check 1948
Hydrography from surveys dated 1870 to 1943
Polyconic projection. 1927 North American datum
10,000-foot grid based on Maine coordinate system,
east zone.

No distinction is made between dwellings, barns,
commercial, and industrial buildings
Unchecked elevations are shown in brown

CONTOUR INTERVAL 20 FEET

DATUM IS MEAN SEA LEVEL

DEPTH CURVES IN FEET—DATUM IS MEAN LOW WATER

SHORELINE SHOWN REPRESENTS THE APPROXIMATE LINE OF MEAN HIGH WATER

THE AVERAGE RANGE OF TIDE IS APPROXIMATELY 13 FEET

THIS MAP COMPLIES WITH NATIONAL MAP ACCURACY STANDARDS

FOR SALE BY U. S. GEOLOGICAL SURVEY, WASHINGTON 25, D. C.

STRATTON, MAINE
PROVISIONAL EDITION 1989

45070-844-1000
Stratton, Me.

Mapped, edited, and published by the Geological Survey
Control by USGS and NOS/NOAA
Topography by photogrammetric methods from aerial photographs
taken 1976. Field checked 1978. Map edited 1982
Selected hydrographic data compiled from NOS chart 13318 (1981)
This information is not intended for navigational purposes
Projection and 10,000-foot grid ticks: Maine coordinate
system, east zone (Transverse Mercator)
1000-meter Universal Transverse Mercator grid, zone 19
1927 North American Datum
To place on the predicted North American Datum 1983
move the projection intersection south 1.1
47 meters west as shown by dashed lines

SCALE 1:24,000
CONTOUR INTERVAL 20 FEET
DOTTED LINES REPRESENT 10-FOOT CONTOURS
NATIONAL GEODETIC VERTICAL DATUM OF 1929
DEPTH CURVES AND SOUNDINGS IN FEET—DASHES IN MEAN LOW WATER
THE RELATIONSHIP BETWEEN THE TWO DATUMS IS VARIABLE
SHORELINE SHOWN REPRESENTS APPROXIMATE LINE OF MEAN HIGH WATER
THE MEAN RANGE OF TIDE IS APPROXIMATELY 10 FEET

APPENDIX A

MAINE ENDANGERED SPECIES ACT

**The Maine Endangered Species Act
State of Maine, Inland Fisheries and Wildlife Laws**

12 MRSA PART 10

CHAPTER 713
SUBCHAPTER V

ENDANGERED SPECIES

§ 7751. Declaration of purpose

The Legislature finds that various species of fish or wildlife have been and are in danger of being rendered extinct within the State of Maine, and that these species are of esthetic, ecological, educational, historical, recreational and scientific value to the people of the State. The Legislature, therefore, declares that it is the policy of the State to conserve, by according such protection as is necessary to maintain and enhance their numbers, all species of fish or wildlife found in the State, as well as the ecosystems upon which they depend.

§ 7752. Commissioner's investigations and programs

- 1. Investigations.** The commissioner may conduct investigations in order to develop information relating to population size, distribution, habitat needs, limiting factors and other biological and ecological data relating to the status and requirements for survival of any resident species of fish or wildlife, whether endangered or not.
- 2. Programs.** The commissioner may develop programs to enhance or maintain these populations.

§ 7753. Designation of endangered species

- 1. Standards.** The commissioner shall recommend a species to be listed as endangered or threatened whenever the commissioner finds one of the following to exist:
 - A. The present or threatened destruction, modification or curtailment of its habitat or range;
 - B. Overutilization for commercial, sporting, scientific, educational or other purposes;
 - C. Disease or predation;
 - D. Inadequacy of existing regulatory mechanisms; or
 - E. Other natural or manmade factors affecting its continued existence within the State.
- 2. Commissioner's duties.** In recommending a species to be listed as endangered or threatened, the commissioner shall:
 - A. Make use of the best scientific, commercial and other data available;
 - B. Consult, as appropriate, with federal agencies, other interested state agencies, other states having a common interest in the species and interested persons and organizations; and

C. Maintain a list of all species that the Legislature has designated to be endangered or threatened, naming each species by both its scientific and common name, if any, and specifying over what portion of its range each species so designated is endangered or threatened.

3. Legislative authority. The Legislature, as sole authority, shall designate a species as state endangered or state threatened species. The list of state endangered or state threatened species is as follows:

Common Name	Scientific Name	Status
Least Tern	<i>Sterna albifrons</i>	Endangered
Golden Eagle	<i>Aquila chrysaetos</i>	Endangered
Piping Plover	<i>Charadrius melodus</i>	Endangered
Sedge Wren	<i>Cistothorus platenis</i>	Endangered
Grasshopper Sparrow	<i>Ammodramus savannarum</i>	Endangered
Box Turtle	<i>Terrapene carolina</i>	Endangered
Black Racer	<i>Coluber constrictor</i>	Endangered
Roseate Tern	<i>Sterna dougallii</i>	Endangered
Northern Bog Lemming	<i>Synaptomys borealis</i>	Threatened
Loggerhead Turtle	<i>Caretta caretta</i>	Threatened
Blanding's Turtle	<i>Emydoidea blandingii</i>	Endangered
Black Tern	<i>Chlidonias niger</i>	Endangered
American Pipit	<i>Anthus rubescens</i>	Endangered
Peregrine Falcon	<i>Falco peregrinus</i>	Endangered
Flat-headed Mayfly	<i>Epeorus frisoni</i>	Endangered
Ringed Boghaunter	<i>Williamsonia lintneri</i>	Endangered
Clayton's Copper	<i>Lycaena dorcas claytoni</i>	Endangered
Edwards' Hairstreak	<i>Satyrrium edwardsii</i>	Endangered
Hessel's Hairstreak	<i>Mitoura hesseli</i>	Endangered
Katahdin Arctic	<i>Oenis polixenes katahdin</i>	Endangered
Spotted Turtle	<i>Clemmys guttata</i>	Threatened
Bald Eagle	<i>Haliaeetus leucocephalus</i>	Threatened
Razorbill	<i>Alca torda</i>	Threatened
Atlantic Puffin	<i>Fratercula arctica</i>	Threatened
Harlequin Duck	<i>Histrionicus histrionicus</i>	Threatened
Arctic Tern	<i>Sterna paradisaea</i>	Threatened
Upland Sandpiper	<i>Bartramia longicauda</i>	Threatened

Swamp Darter	Etheostoma fusiforme	Threatened
Tidewater Mucket	Leptodea ochracea	Threatened
Yellow Lampmussel	Lampsilis cariosa	Threatened
Tomah Mayfly	Siphonisca aerodromia	Threatened
Pygmy Snaketail	Ophiogomphus howei	Threatened
Twilight Moth	Lycia rachelae	Threatened
Pine Barrens Zanclognatha	Zanclognatha martha	Threatened

3-A. Temporary authority. Notwithstanding any other provision of this subchapter, the commissioner may consider a species found in the State that is not listed in subsection 3 as a state endangered or state threatened species if that species is listed as an endangered or threatened species by the Secretary of the Interior of the United States, pursuant to the United States Endangered Species Act of 1973, Public Law 93-205, as amended. This subsection is repealed 90 days after the adjournment of the First Regular Session of the 118th Legislature.

4. Process for recommendation; notice and hearings. Prior to recommending an addition, deletion or other change to the endangered and threatened species listed in subsection 3, the commissioner shall provide for public notice and public hearings on that proposed recommendation in accordance with the provisions of Title 5, chapter 375, subchapter II.

5. Designation by Legislature. The Legislature may not amend the list of endangered or threatened species in subsection 3 except upon the recommendation of the commissioner.

§ 7754. Conservation of endangered species

1. Conservation of nongame and endangered species. The commissioner may establish such programs as are necessary to bring any endangered or threatened species to the point where it is no longer endangered or threatened, including:

- A. Acquisition of land or aquatic habitat or interests in land or aquatic habitat;
- B. Propagation;
- C. Live trapping;
- D. Transplantation. Prior to the transplantation, introduction or reintroduction of an endangered or threatened species in the State, the commissioner shall, in conjunction with the Atlantic Sea Run Salmon Commission, when appropriate, develop a recovery plan for that species, conduct a public hearing on that recovery plan pursuant to Title 5, Part 18 and submit that plan to the joint standing committee of the Legislature having jurisdiction over inland fisheries and wildlife matters. The introduction or reintroduction of that species must be conducted in accordance with the recovery plan developed under this paragraph and may not begin sooner than 90 days after all conditions of this paragraph have been met; and
- E. In the extraordinary case where population pressures within a given group ecosystem can not be otherwise relieved, regulated taking.

2. Habitat. For species designated as endangered or threatened under this subchapter the commissioner may, by rule, pursuant to Title 5, chapter 375, identify areas currently or historically providing physical or biological features essential to the conservation of the species and which may require special management considerations.

3. Protection guidelines. The commissioner may, by rule, pursuant to Title 5, chapter 375, develop guidelines for the protection of species designated as endangered or threatened under this subchapter.

4. Annual report. The commissioner shall submit a written report by January 1st of each year to the joint standing committee of the Legislature having jurisdiction over inland fisheries and wildlife matters describing the status of all current and planned programs, activities and rules of the department pertaining to the conservation or management of endangered or threatened species. When appropriate, this report may be combined with any transplantation report required under subsection 1, paragraph D.

§ 7755. Cooperative agreements

The commissioner may enter into agreements with federal agencies, other states, political subdivisions of this State or private persons for the establishment and maintenance of programs for the conservation of endangered or threatened species and may receive all federal funds allocated for obligations to the State pursuant to these agreements.

§ 7755-A. State and local cooperation

1. Review. A state agency or municipal government shall not permit, license, fund or carry out projects that will:

A. Significantly alter the habitat identified under section 7754, subsection 2 of any species designated as threatened or endangered under this subchapter; or

B. Violate protection guidelines set forth in section 7754, subsection 3.

The commissioner shall make information under section 7754 available to all other state agencies and municipal governments for the purposes of review.

2. Variance. Notwithstanding subsection 1, state agencies and municipal governments may grant a variance from this section provided that:

A. The Commissioner of Inland Fisheries and Wildlife certifies that the proposed action would not pose a significant risk to any population of endangered or threatened species within the State; and

B. A public hearing is held on the proposed action.

3. Pending applications. Notwithstanding Title 1, section 302, applications pending at the time of adoption of habitats and guidelines under section 7754, subsections 2 and 3 shall be governed by these provisions.

§ 7756. Prohibited acts

1. Misuse of endangered or threatened species. A person is guilty, except as provided in subsection 2, of misuse of an endangered or threatened species if that person does any of the following:

A. Exports any endangered or threatened species from the State;

B. Hunts, traps or possesses any endangered or threatened species within the State;

C. Possesses, processes, sells, offers for sale, delivers, carries, transports or ships, by any means whatsoever, any endangered or threatened species; or

D. Deliberately feeds, sets bait for or harasses any endangered or threatened species, except as allowed under subsection 2, paragraph A. A warning shall be issued for the first violation. The 2nd violation shall be punishable as a Class E crime.

2. Exceptions. Notwithstanding subsection 1, the commissioner may:

A. Under such terms and conditions as he may prescribe, permit any act prohibited by this section, for educational or scientific purposes or to enhance the propagation or survival of an endangered or threatened species; and

B. Under such terms and conditions as he may prescribe, permit any endangered or threatened species which enters the State and is being transported to a point outside the State to be so entered and transported without restriction in accordance with the terms of any federal or state permit.

§ 7757. Maine Endangered and Nongame Wildlife Fund

1. Establishment. There is established the Maine Endangered and Nongame Wildlife Fund. The fund receives money deposited by the Treasurer of State pursuant to section 7759 and Title 36, section 5284, revenues generated in accordance with this section and any money contributed voluntarily to the fund. All money deposited in the fund and the earnings on that money remain in the fund to be used for the management of nongame wildlife and for necessary administrative and personnel costs associated with the management of nongame wildlife and may not be deposited in the General Fund or any other fund, except as specifically provided by law.

2. Report and allocation. The Commissioner of Inland Fisheries and Wildlife shall include a report on the Maine Endangered and Nongame Wildlife Fund as part of the report submitted to the Governor pursuant to section 7034. This report shall also be submitted to the joint standing committee of the Legislature having jurisdiction over fisheries and wildlife. The commissioner shall submit a budget for each biennium in accordance with Title 5, sections 1663 to 1666. The State Controller shall authorize expenditures from the fund as allocated by the Legislature.

3. Grants. Any person, organization or agency of the State may apply to the Department of Inland Fisheries and Wildlife for a grant to undertake research and nongame wildlife management activities. The department may award grants out of the Maine Endangered and Nongame Wildlife Fund. For the purposes of this section, "nongame wildlife" includes all unconfined terrestrial, freshwater and saltwater species which are not ordinarily collected, captured or killed for sport or profit.

4. Fund raising. The commissioner or the commissioner's authorized agent may provide for the creation, reproduction, sale, licensing, distribution and other disposal of any art or products for the purpose of generating revenues for the management of the State's nongame wildlife. All money generated from the sale of these items must be deposited in the Maine Endangered and Nongame Wildlife Fund.

§ 7758. Judicial enforcement

1. General. In the event of a violation of this subchapter, any rule adopted pursuant to this subchapter or any license or permit granted under this subchapter, the Attorney General may institute injunctive proceedings to enjoin any further violation, a civil or criminal action, or any appropriate combination of those proceedings without recourse to any other provision of law administered by the Department of Inland Fisheries and Wildlife.

2. Restoration. The court may order restoration of any area, affected by any activity found to be in violation of this subchapter, any rule adopted pursuant to this subchapter or any license or permit granted under this subchapter, to its condition prior to the violation or as near to that condition as possible. When the court finds that the violation was willful, the court shall order restoration under this subchapter, unless the restoration would result in:

- A. A threat to public health and safety;
- B. Environmental damage; or
- C. A substantial injustice.

§ 7759. Maine Environmental Trust Fund

1. Fund established. The Maine Environmental Trust Fund, referred to in this section as the "fund," is established as a nonlapsing fund administered by the commissioner for the purposes of improving state parks and historic sites by supporting the Maine State Parks Fund and managing nongame wildlife by supporting the Maine Endangered and Nongame Wildlife Fund. Money deposited with the Treasurer of State to the credit of the fund may be invested as provided by law. Income from these investments must be credited to the fund.

2. Fund sources. The fund receives money deposited by the Treasurer of State pursuant to Title 29-A, section 455 and any other gift, grant or other source of revenue deposited for that use.

3. Distribution from fund. Money distributed from the fund may be used for marketing the plates and for the production and marketing of goods using the environmental plate design. After the Treasurer of State has reimbursed the Secretary of State for costs of producing and issuing environmental registration plates in accordance with Title 29-A, section 455, the Treasurer of State shall, at the end of each quarter in the fiscal year, distribute the balance in the fund as follows:

- A. Sixty percent of the balance must be deposited in the Maine State Parks Fund established in section 610; and
- B. Forty percent of the balance must be deposited in the Maine Endangered and Nongame Wildlife Fund established in section 7757.

4. Budget. The commissioner shall submit a budget for each biennium pursuant to Title 5, sections 1663 and 1666.

APPENDIX B

MAINE ENDANGERED AND THREATENED SPECIES LIST

MAINE ENDANGERED AND THREATENED SPECIES

Maine Endangered Species:

1. Peregrine Falcon - Falco peregrinus* (breeding population only)
2. Golden Eagle - Aquila chrysaetos
3. Piping Plover - Charadrius melodus**
4. Least Tern - Sterna antillarum
5. Roseate Tern - Sterna dougallii*
6. Sedge Wren - Cistothorus platensis
7. Grasshopper Sparrow - Ammodramus savannarum
8. Black Tern - Chlidonias niger
9. American Pipit - Anthus rubescens (breeding population only)
10. Blanding's Turtle - Emydoidea blandingii
11. Box Turtle - Terrapene carolina
12. Black Racer - Coluber constrictor
13. A Flat-headed Mayfly - Epeorus frisoni
14. Ringed Boghaunter - Williamsoni lintneri
15. Clayton's Copper - Lycaena dorcas claytoni
16. Edwards' Hairstreak - Satyrrium edwardsii
17. Hessel's Hairstreak - Mitoura hesseli
18. Katahdin Arctic - Oeneis polixenes katahdin

Maine Threatened Species:

1. Bald Eagle - Haliaeetus leucocephalus**
2. Razorbill - Alca torda
3. Atlantic Puffin - Fratercula arctica
4. Harlequin Duck - Histrionicus histrionicus
5. Arctic Tern - Sterna paradisaea
6. Upland Sandpiper - Bartramia longicauda
7. Northern Bog Lemming - Synaptomys borealis
8. Loggerhead Turtle - Caretta caretta**
9. Spotted Turtle - Clemmys guttata
10. Swamp Darter - Etheostoma fusiforme
11. Tidewater Mucket - Leptodea ochracea
12. Yellow Lampmussel - Lampsilis cariosa
13. Tomah Mayfly - Siphonisca aerodromia
14. Pygmy Snaketail - Ophiogomphus howei
15. Twilight Moth - Lycia rachelae
16. Pine Barrens Zanclognatha - Zanclognatha martha

*Federally listed Endangered Species

**Federally listed Threatened Species

MDIFW ISSUE PROFILES

ISSUE PROFILE

ESSENTIAL HABITAT: BALD EAGLE NEST SITES

ENDANGERED & THREATENED SPECIES PROGRAM

October 1997

BACKGROUND

Maine's fish and wildlife are a valuable public resource, yet some species are in danger of becoming extinct within the State. The Legislature recognized this by passing the Maine Endangered Species Act in 1975. In 1988, the Legislature amended the Act by adding habitat protection provisions in recognition of two issues: 1) the effect habitat loss has on Endangered and Threatened Species in Maine; and 2) the confusion and sometimes costly problems that arise in the absence of consistent, predictable land use decision-making processes for Endangered and Threatened Species. As a result, the Commissioner of the Maine Department of Inland Fisheries and Wildlife (DIFW) may designate areas as "Essential Habitat" and develop protection guidelines for these Essential Habitats.

WHAT ARE ESSENTIAL HABITATS?

Essential Habitats are areas currently or historically providing physical or biological features essential to the conservation of an Endangered or Threatened Species in Maine and which may require special management considerations. Examples of areas that could qualify for designation are nest sites or important feeding areas. For some species, protection of these kinds of habitats is vital to preventing further declines or achieving recovery goals. This habitat protection tool is used only when habitat loss has been identified as a major factor limiting a species' recovery. Before an area can be designated as Essential Habitat, it must be identified and mapped by the DIFW and adopted through public rulemaking procedures, following Maine's Administrative Procedures Act.

WHY DOES THE BALD EAGLE NEED THIS LEVEL OF PROTECTION?

Historically, Maine was home to hundreds of pairs of bald eagles nesting along undisturbed shorelines of the coast, lakes, and major rivers. However, largely due to DDT contamination, eagle populations declined so drastically that they were listed as an Endangered Species in 1978. As DDT residues in the environment dropped, bald eagles began to recover in Maine. Increasing losses of undisturbed nesting sites during the late 1980's, however, threatened further population growth and recovery of the species. Adequate numbers of young eagles must be produced from Maine's traditional eagle nesting sites if the population is to achieve a lasting recovery from Endangered or Threatened status. Loss of undisturbed nesting sites is now the greatest danger to Maine's eagle population. For this reason, designation of nest sites as Essential Habitat (on-going since 1990) plays an important role in the recovery of Maine's bald eagle population. Recovery progress was symbolized by the reclassification of the bald eagle as a Threatened Species in 1995.

WHAT DOES ESSENTIAL HABITAT DESIGNATION MEAN TO A LANDOWNER?

Activities of private landowners are **not** affected by Essential Habitat designation **unless projects require a permit or license from, or are funded or carried out by, a state agency or municipality**. In these cases, the town or state agency reviewing a project must obtain an evaluation from the DIFW before issuing a decision. **No new permits or fees are required.** Designation of Essential Habitat simply establishes a standardized review process within existing state and municipal permitting processes. It ensures landowners of consistent reviews on land use permit applications where Endangered and Threatened Species are involved, and eliminates the confusion, delays, and sometimes costly problems which can arise in the absence of standardized, predictable decision-making.

When projects are proposed within Essential Habitats, **landowners should initiate early consultations with the appropriate DIFW Regional Wildlife Biologist** so that concerns for Endangered or Threatened Species can be incorporated into preliminary project planning and design. The Department also offers technical assistance to property owners who wish to manage their lands to enhance habitat for wildlife.

WHAT DOES ESSENTIAL HABITAT DESIGNATION MEAN TO STATE AGENCIES AND MUNICIPALITIES?

State agencies and municipalities cannot permit, license, fund, or carry out projects which will significantly alter an Essential Habitat or violate protection guidelines adopted for the habitat. Early consultations with DIFW Regional Wildlife Biologists will facilitate identification of incompatible projects or appropriate modifications to proposals within an Essential Habitat. Concerns for Endangered and Threatened Species should be addressed during preliminary planning and existing agency or municipal review procedures and before seeking final DIFW evaluation. Failure to do so may result in unnecessary conflicts, delays, or project denials. The Department also offers guidance to municipalities when wildlife concerns are being addressed in comprehensive plans and town ordinances.

HOW DO YOU DETERMINE IF A PROJECT IS WITHIN AN ESSENTIAL HABITAT?

All Essential Habitats are mapped on standard 1:24,000 U.S.G.S. topographic maps. These Essential Habitat maps are available for viewing in affected town offices, all DIFW offices, and most DEP, DMR and LURC offices. In addition, reduced copies of maps are contained within the "Atlas Of Essential Wildlife Habitats For Maine's Endangered And Threatened Species", which can be found in all county Registry of Deeds offices, State libraries, and most State agencies.

IF ONLY A PART OF YOUR PROPERTY IS WITHIN AN ESSENTIAL HABITAT, WILL EVERY PROJECT YOU CONSIDER BE AFFECTED BY ESSENTIAL HABITAT DESIGNATION?

No. Projects located wholly outside an Essential Habitat, regardless of whether some other portion of your property is within an Essential Habitat, are not affected by this rule. **Contact a DIFW Regional Wildlife Biologist for assistance in verifying project locations relative to an Essential Habitat.**

WHAT TYPES OF PROJECTS REQUIRE DIFW EVALUATION?

Any project that is wholly or partly within an Essential Habitat and is permitted, licensed, funded, or carried out by a state agency or municipal government, requires an evaluation by the Commissioner of the DIFW. Some examples of projects that require DIFW evaluation are:

- subdivision of land
- construction or alteration of buildings, waste-water systems, or utilities
- conversion of seasonal dwellings to year round
- exemption to minimum lot size requirements
- construction or relocation of roads
- exploration or extraction of minerals
- alteration to wetlands, submerged bottomlands, or shoreland zones
- installation of docks, moorings, or aquaculture facilities

Landowners, project planners, municipalities or state agencies considering a project proposal in or near an Essential Habitat should immediately contact a DIFW Regional Wildlife Biologist for assistance. **Early consultations will help to resolve avoidable conflicts and prevent unnecessary delays, frustrations, and economic pitfalls that might otherwise arise during the final project review.**

ARE THERE PROJECTS EXEMPT FROM DIFW REVIEW?

Yes. The following are examples of projects exempt from evaluation by the Department:

- emergency repairs to existing structures and utilities
- emergency activities necessary for public health and safety
- interior repairs and construction
- any project not carried out by, funded by, or requiring a permit or license from a state agency or municipality

WHAT ARE THE REVIEW STANDARDS FOR PROJECTS WITHIN ESSENTIAL HABITATS?

A project must not significantly alter an Essential Habitat. If the DIFW evaluation determines that significant alteration of the habitat would occur, a state agency or municipal government may not issue a permit or license for the project. The following factors are considered by the DIFW when evaluating a project proposal at bald eagle nest sites:

- seasonal timing of project
- noise and human activity generated by project before, during, or after completion
- impact on wetlands, shoreland zones, or important visual buffers
- impact on key habitat components such as nesting, foraging, perching, or roosting areas
- reduction in the seclusion of the nest site due to increased access from upland areas, shoreland zones, or adjacent waters
- impact on future suitability of the nest site due to new uses, cumulative impacts, or local limitations within the area
- demonstrated tolerance by eagles at the site for types of activities associated with the project

IS THE SEASONAL TIMING OF PROJECTS A MAJOR CONCERN?

Yes! Eagles are very sensitive to disturbance during their nesting season. Generally this is between **February 1 and August 31** but varies greatly from coastal Maine to northern, interior regions. Seasonal timing of activities will often be a determining factor in project reviews and should always be addressed in a project's design before seeking final DIFW evaluation. **Contact a DIFW Regional Wildlife Biologist for assistance in determining seasonal timing concerns.** Examples of projects often acceptable outside the critical nesting season are:

- expansion, alteration, or repair of existing structures
- routine road maintenance
- forest management, timber harvest, and agricultural management
- mineral exploration
- construction, if all other review standards are met

ONCE AN AREA IS DESIGNATED AS ESSENTIAL HABITAT, WILL IT ALWAYS BE SO?

No. The law allows Essential Habitat designation only for Endangered or Threatened Species. Designating bald eagle nest sites as Essential Habitat will allow Maine's eagle population to grow. The bald eagle was reclassified from Endangered to Threatened in 1995, and its population in Maine is expected to increase to the point where eagles are no longer Threatened. When this occurs, all Essential Habitat designations for bald eagle nests will be eliminated. Also, if a nest site no longer provides the physical or biological features essential for bald eagles, Essential Habitat designation will be removed.

WHO CAN YOU CONTACT FOR MORE INFORMATION?

The Maine Department of Inland Fisheries and Wildlife. There are seven regional offices to assist you. Please contact a Regional Wildlife Biologist at the nearest regional headquarters:

ISSUE PROFILE

ESSENTIAL HABITAT: ROSEATE TERN NESTING AREAS

ENDANGERED & THREATENED SPECIES PROGRAM

May 1995

BACKGROUND

Maine's fish and wildlife are a valuable public resource, yet some species are in danger of becoming extinct within the State. The Legislature recognized this by passing the Maine Endangered Species Act in 1975. In 1988, the Legislature amended the Act by adding habitat protection provisions in recognition of two issues: 1) the effect habitat loss has on Endangered and Threatened Species in Maine; and 2) the confusion and sometimes costly problems that arise in the absence of consistent, predictable land use decision-making processes for Endangered and Threatened Species. As a result, the Commissioner of the Maine Department of Inland Fisheries and Wildlife (DIFW) may designate areas as "Essential Habitat" and develop protection guidelines for these Essential Habitats.

WHAT ARE ESSENTIAL HABITATS?

Essential Habitats are areas currently or historically providing physical or biological features essential to the conservation of an Endangered or Threatened Species in Maine and which may require special management considerations. Examples of areas that could qualify for designation are nest sites or important feeding areas. For some species, protection of these kinds of habitats is vital to preventing further declines or achieving recovery goals. This habitat protection tool is used only when habitat loss has been identified as a major factor limiting a species' recovery. Before an area can be designated as Essential Habitat, it must be identified and mapped by the DIFW and adopted through formal, public rule-making procedures.

WHY DOES THE ROSEATE TERN NEED THIS LEVEL OF PROTECTION?

Roseate terns are small, graceful seabirds that return each spring to nest and raise their young on a few traditionally used islands along the eastern coast of North America. Although exact historic figures are unknown, it is likely that several hundred pairs once nested in Maine. During the late 1800's, however, roseate tern numbers declined drastically as human-related habitat degradation and unrestricted shooting nearly eliminated the species throughout its range.

Around the turn of the century, state and federal laws were passed to prohibit indiscriminate killing of terns and other migratory birds. At the same time, human influences on coastal islands were decreasing. As a result, roseate tern numbers increased. By the early 1930's, Maine's population had grown to about 275 pairs. This recovery was not to last. Renewed pressures from habitat loss and human disturbance, combined with predation and competition from a growing gull population, initiated a second decline. By 1987, as few as 52 pairs of roseate terns nested in Maine.

In 1986, the roseate tern was listed as an Endangered Species under both the United States and Maine Endangered Species Acts. As a result of intensive management efforts, Maine's population has grown to approximately 125 pairs. Roseate terns in Maine nest on just a small handful of islands. After more than 100 years of record-keeping, they have been found on only 21 of the more than 3,500 islands off our coast. These few islands, providing the unique combination of features necessary for successful

nesting, are essential to the restoration of roseate terns in Maine. Disturbances or land use changes at these traditional sites can cause nesting failure and consequently prevent the overall population from maintaining its numbers or increasing to recovery levels. For this reason, they are the focus of Essential Habitat designation for roseate terns.

WHAT DOES ESSENTIAL HABITAT DESIGNATION MEAN TO A LANDOWNER?

Activities of private landowners are not affected by Essential Habitat designation **unless projects require a permit or license from, or are funded or carried out by, a state agency or municipality.** In these cases, the town or state agency reviewing a project must obtain an evaluation from the DIFW before issuing a decision. **No new permits or fees are required.** Designation of Essential Habitat simply establishes a standardized review process within existing state and municipal permitting processes. It ensures landowners of consistent reviews on land use permit applications where Endangered Species are involved, and eliminates the confusion, delays, and sometimes costly problems which can arise in the absence of standardized, predictable decision-making.

When projects are proposed within Essential Habitats, **landowners should initiate early consultations with the appropriate DIFW Regional Wildlife Biologist** so that concerns for Endangered Species can be incorporated into preliminary project planning and design. The Department also offers technical assistance to property owners who wish to manage their lands to enhance habitat for Endangered Species or other wildlife.

WHAT DOES ESSENTIAL HABITAT DESIGNATION MEAN TO STATE AGENCIES AND MUNICIPALITIES?

State agencies and municipalities cannot permit, license, fund, or carry out projects which will **significantly alter an Essential Habitat or violate protection guidelines adopted for the habitat.** Early consultations with DIFW Regional Wildlife Biologists will facilitate identification of incompatible projects or appropriate modifications to proposals within an Essential Habitat. Concerns for Endangered Species should be addressed during preliminary planning and existing agency or municipal review procedures and before seeking final DIFW evaluation. Failure to do so may result in unnecessary conflicts, delays, or project denials. The Department also offers guidance to municipalities when concerns for Endangered Species and other wildlife are being addressed in comprehensive plans and town ordinances.

HOW DO YOU DETERMINE IF A PROJECT IS WITHIN AN ESSENTIAL HABITAT?

All Essential Habitats are mapped on standard 1:24,000 U.S.G.S. topographic maps. These Essential Habitat maps are available for viewing in affected town offices, all DIFW offices, and most DEP, DMR, and LURC offices. In addition, reduced copies of maps are contained within the "Atlas Of Essential Wildlife Habitats For Maine's Endangered And Threatened Species", which can be found in all county Registry of Deeds offices, State libraries, and most State agencies.

IF ONLY A PART OF YOUR PROPERTY IS WITHIN AN ESSENTIAL HABITAT, WILL EVERY PROJECT YOU CONSIDER BE AFFECTED BY ESSENTIAL HABITAT DESIGNATION?

No. Projects located wholly outside an Essential Habitat, regardless of whether some other portion of your property is within an Essential Habitat, are not affected by this rule. **Contact a DIFW Regional Wildlife Biologist for assistance in verifying project locations relative to an Essential Habitat.**

WHAT TYPES OF PROJECTS REQUIRE DIFW EVALUATION?

Any project that is wholly or partly within an Essential Habitat and is permitted, licensed, funded, or carried out by a state agency or municipal government, requires an evaluation by the Commissioner of the DIFW. Some examples of projects that require DIFW evaluation are:

- subdivision of land
- construction or alteration of buildings, waste-water systems, or utilities
- conversion of seasonal dwellings to year round
- exemption to minimum lot size requirements
- construction or relocation of roads
- exploration or extraction of minerals
- alteration to wetlands, submerged bottomlands, or shoreland zones
- installation of docks, moorings, or aquaculture facilities

Landowners, project planners, municipalities or state agencies considering a project proposal in or near an Essential Habitat should immediately contact a DIFW Regional Wildlife Biologist for assistance.

Early consultations will help to resolve avoidable conflicts and prevent unnecessary delays, frustrations, and economic pitfalls that might otherwise arise during the final project review.

ARE THERE PROJECTS EXEMPT FROM DIFW REVIEW?

Yes. The following are examples of projects exempt from evaluation by the Department:

- emergency repairs to existing structures and utilities
- emergency activities necessary for public health and safety
- interior repairs and construction
- any project not carried out by, funded by, or requiring a permit or license from, a state agency or municipality

WHAT ARE THE REVIEW STANDARDS FOR PROJECTS WITHIN ESSENTIAL HABITATS?

A project must not significantly alter an Essential Habitat. If the DIFW evaluation determines that significant alteration of the habitat would occur, a state agency or municipal government may not issue a permit or license for the project. The following factors are considered by the DIFW when evaluating a project proposal at roseate tern nesting areas:

- seasonal timing of project
- noise and human activity generated by project before, during, or after completion
- physical alteration to uplands, waters, or submerged lands
- impact on key habitat components such as island vegetation, nesting and roosting substrate, and foraging areas
- increase in human disturbance, predation, or competition with other species
- demonstrated tolerance of terns at the site to human activity and disturbance
- reduction in the future suitability of the nesting area for roseate terns

IS THE SEASONAL TIMING OF PROJECTS A MAJOR CONCERN?

Yes! Roseate terns are very sensitive to disturbance during their nesting season. Generally this is between **May 15 and August 31** but may vary slightly from year to year. Seasonal timing of activities will often be a determining factor in project reviews and should always be addressed in a project's design before seeking final DIFW evaluation. **Contact a DIFW Regional Wildlife Biologist for assistance in determining seasonal timing concerns.** Examples of projects often acceptable outside the critical nesting season are:

- expansion, alteration, or repair of existing structures
- construction, if all other review standards are met

ONCE AN AREA IS DESIGNATED AS ESSENTIAL HABITAT, WILL IT ALWAYS BE SO?

No. The law allows Essential Habitat designation only for Endangered or Threatened Species. Designating roseate tern nesting islands as Essential Habitat will allow Maine's roseate tern population to grow. If the species recovers to the point where it is no longer Endangered or Threatened, all Essential Habitat designations for roseate terns will be eliminated. Also, if a nesting area is no longer considered essential to achieving recovery goals for the species, Essential Habitat designation would be removed.

ISSUE PROFILE

ESSENTIAL HABITAT: PIPING PLOVER AND LEAST TERN NESTING, FEEDING, AND BROOD- REARING AREAS

ENDANGERED & THREATENED SPECIES PROGRAM

October 1997

BACKGROUND

Maine's fish and wildlife are a valuable public resource, yet some species are in danger of becoming extinct within the State. The Legislature recognized this by passing the Maine Endangered Species Act in 1975. In 1988, the Legislature amended the Act by adding habitat protection provisions in recognition of two issues: 1) the effect habitat loss has on Endangered and Threatened Species in Maine; and 2) the confusion and sometimes costly problems that arise in the absence of consistent, predictable land use decision-making processes for Endangered and Threatened Species. As a result, the Commissioner of the Maine Department of Inland Fisheries and Wildlife (DIFW) may designate areas as "Essential Habitat" and develop protection guidelines for these Essential Habitats.

WHAT ARE ESSENTIAL HABITATS?

Essential Habitats are areas currently or historically providing physical or biological features essential to the conservation of an Endangered or Threatened Species in Maine and which may require special management considerations. Examples of areas that could qualify for designation are nest sites or important feeding areas. For some species, protection of these kinds of habitats is vital to preventing further declines or achieving recovery goals. This habitat protection tool is used only when habitat loss has been identified as a major factor limiting a species' recovery. Before an area can be designated as Essential Habitat, it must be identified and mapped by the DIFW and adopted through public rulemaking procedures, following Maine's Administrative Procedures Act.

WHY DO THE PIPING PLOVER AND LEAST TERN NEED THIS LEVEL OF PROTECTION?

The piping plover is a small, sandy-colored shorebird that nests on beaches from Newfoundland to South Carolina. The least tern is the smallest North American tern and nests on beaches along the East and West Coasts. Both species are imperiled throughout much of their range in the United States and Canada. Once common on sand beaches in southern Maine, the piping plover and least tern are now listed as Endangered under the Maine Endangered Species Act. The East Coast population of piping plovers is also federally-listed as Threatened. In 1997, only 45 pairs of piping plovers and 60 pairs of least terns nested in Maine.

Habitat loss and lack of undisturbed nest sites are two of the primary factors jeopardizing populations of piping plovers and least terns. Historically, Maine had more than 30 miles of suitable nesting beaches that may have supported up to 200 pairs of piping plovers and 1200 pairs of least terns. However, the construction of seawalls, jetties, piers, homes, parking lots, and other structures along Maine's sand beaches has reduced the amount of suitable nesting habitat available to these species by more than 75%. Today, only twelve sites provide suitable habitat where these two species nest, feed, and raise their young. The capability of this remaining habitat to support nesting plovers and terns is further reduced by continued development and intense recreational use. Ensuring the availability of this limited habitat is essential for the continued existence of piping plovers and least terns in Maine. Designation of these areas as Essential Habitat (on-going since 1995) will help to maintain the last remaining habitat for these endangered birds.

WHAT DOES ESSENTIAL HABITAT DESIGNATION MEAN TO A LANDOWNER?

Activities of private landowners are not affected by Essential Habitat designation **unless projects require a permit or license from, or are funded or carried out by, a state agency or municipality.** In these cases, the town or state agency reviewing a project must obtain an evaluation from the DIFW before issuing a decision. **No new permits or fees are required.** Designation of Essential Habitat simply establishes a standardized review process within existing state and municipal permitting processes. It ensures landowners of consistent reviews on land use permit applications where Endangered and Threatened Species are involved, and eliminates the confusion, delays, and sometimes costly problems which can arise in the absence of standardized, predictable decision-making.

When projects are proposed within Essential Habitats, **landowners should initiate early consultations with the appropriate DIFW Regional Wildlife Biologist** so that concerns for Endangered or Threatened Species can be incorporated into preliminary project planning and design. When projects also fall within areas governed by Maine's coastal sand dune laws, all requirements of the DEP and sand dune laws must be met before the DIFW will consider the project.

The DIFW also offers technical assistance to property owners who wish to manage their lands to enhance habitat for wildlife.

WHAT DOES ESSENTIAL HABITAT DESIGNATION MEAN TO STATE AGENCIES AND MUNICIPALITIES?

State agencies and municipalities cannot permit, license, fund, or carry out projects which will **significantly alter an Essential Habitat or violate protection guidelines adopted for the habitat.** Early consultations with DIFW Regional Wildlife Biologists will facilitate identification of incompatible projects or appropriate modifications to proposals within an Essential Habitat. Concerns for Endangered and Threatened Species should be addressed during preliminary planning and existing agency or municipal review procedures and before seeking final DIFW evaluation. Failure to do so may result in unnecessary conflicts, delays, or project denials. The Department also offers guidance to municipalities when wildlife concerns are being addressed in comprehensive plans and town ordinances.

HOW DO YOU DETERMINE IF A PROJECT IS WITHIN AN ESSENTIAL HABITAT?

All Essential Habitats are mapped on standard 1:24,000 U.S.G.S. topographic maps. In addition, detailed maps have been prepared for all developed beach areas on 1:9,200 color aerial photos. These maps and photos depict the precise boundaries of Essential Habitats in relation to houses, roads, seawalls and other physical features. Essential Habitat maps and detail photos are available for viewing in affected town offices, DIFW offices in Gray, Augusta, Sidney and Bangor, and DEP offices in Portland and Augusta. Reduced copies of the maps are contained within the "Atlas Of Essential Wildlife Habitats For Maine's Endangered And Threatened Species", which can be found in all county Registry of Deeds offices, State libraries, and most State agencies.

IF ONLY A PART OF YOUR PROPERTY IS WITHIN AN ESSENTIAL HABITAT, WILL EVERY PROJECT YOU CONSIDER BE AFFECTED BY ESSENTIAL HABITAT DESIGNATION?

No. Projects located wholly outside an Essential Habitat, regardless of whether some other portion of your property is within an Essential Habitat, are not affected by this rule. **Contact a DIFW Regional Wildlife Biologist for assistance in verifying project locations relative to an Essential Habitat.**

WHAT TYPES OF PROJECTS REQUIRE DIFW EVALUATION?

Any project that is wholly or partly within an Essential Habitat and is permitted, licensed, funded, or carried out by a state agency or municipal government, requires an evaluation by the Commissioner of the DIFW. Some examples of projects that require DIFW evaluation are:

- subdivision of land
- construction or alteration of buildings, waste-water systems, or utilities
- exemption to minimum lot size requirements
- construction or relocation of roads
- dredging, bulldozing, or removing or displacing soil, sand, vegetation, or other materials
- alteration to wetlands, submerged bottomlands, or shoreland zones
- installation of docks, moorings, or aquaculture facilities
- beach nourishment or dune restoration
- state or municipal beach recreation management

Landowners, project planners, municipalities or state agencies considering a project proposal in or near an Essential Habitat should immediately contact a DIFW Regional Wildlife Biologist for assistance. **Early consultations will help to resolve avoidable conflicts and prevent unnecessary delays, frustrations, and economic pitfalls that might otherwise arise during the final project review.**

ARE THERE PROJECTS EXEMPT FROM DIFW REVIEW?

Yes. The following are examples of projects exempt from evaluation by the Department:

- emergency activities necessary for public health and safety
- emergency repairs to existing utilities and structures, including seawalls and roads
- any project not carried out by, funded by, or requiring a permit or license from a state agency or municipality

WHAT ARE THE REVIEW STANDARDS FOR PROJECTS WITHIN ESSENTIAL HABITATS?

A project must not significantly alter an Essential Habitat. If the DIFW evaluation determines that significant alteration of the habitat would occur, a state agency or municipal government may not issue a permit or license for the project. The following factors are considered by the DIFW when evaluating a project proposal at piping plover and least tern nesting, feeding, and brood-rearing areas:

- seasonal timing and magnitude of project
- degradation of coastal wetlands or sand dune systems
- increase in human disturbance, predation, or competition from other species
- reduction in the future capability of the habitat to provide nesting, feeding, and brood-rearing opportunities

IS THE SEASONAL TIMING OF PROJECTS A MAJOR CONCERN?

Yes! Piping plovers and least terns are sensitive to disturbance during their nesting season. Generally this is between **May 1 and August 31** but may vary slightly from year to year. Seasonal timing of activities will often be a determining factor in project reviews and should always be addressed in a project's design before seeking final DIFW evaluation. **Contact a DIFW Regional Wildlife Biologist for assistance in determining seasonal timing concerns.**

WILL BEACHES WITHIN ESSENTIAL HABITATS CONTINUE TO BE OPEN FOR SWIMMING AND SUNBATHING?

Yes. Some of our most popular State Parks (ie. Reid and Popham Beach) are also successful tern and plover areas. They provide examples of how, if managed properly, plovers, terns and existing recreational uses of beaches can coexist.

COULD ESSENTIAL HABITAT DESIGNATION BE USED TO PREVENT REBUILDING OF STORM OR FIRE-DAMAGED STRUCTURES OR SEAWALLS?

No. This rule is not intended to preclude rebuilding of existing structures in accordance with implementation of the coastal sand dune regulations. Furthermore, emergency repairs to utilities and structures, including seawalls, are exempt from this rule.

ONCE AN AREA IS DESIGNATED AS ESSENTIAL HABITAT, WILL IT ALWAYS BE SO?

Not Necessarily. The law allows Essential Habitat designation only for Endangered or Threatened Species. Designating piping plover and least tern nesting, feeding, and brood-rearing areas as Essential Habitat will allow Maine's piping plover and least tern populations to grow. If these species recover to the point where they are no longer Endangered or Threatened, all Essential Habitat designations will be eliminated. Also, if an area is no longer considered essential to achieving recovery goals for the species, Essential Habitat designation would be removed.

WHO CAN YOU CONTACT FOR MORE INFORMATION?

The Maine Department of Inland Fisheries and Wildlife. Please contact a Regional Wildlife Biologist at the nearest regional headquarters:

LIST OF ESSENTIAL HABITAT MAPS AND THEIR CURRENT EFFECTIVE DATES

LIST OF ESSENTIAL HABITAT MAPS AND THEIR CURRENT EFFECTIVE DATES¹

Abol Pond (2/20/98)	East Millinocket (10/1/99)
Addison (2/20/98)	Eastbrook (3/1/90)
Alligator Lake (3/31/95)	Eastport (10/1/99)
Bailey Island (3/1/93)	Ellsworth (3/31/95)
Baker Island (10/1/99)	Fairfield (2/20/98)
Bar Harbor (10/1/99)	Farrow Mountain (3/31/95)
Bartlett Island (2/20/98)	Fifth Musquacook Lake (2/20/98)
Bass Harbor (10/1/99)	Fletcher Peak (3/31/95)
Bath (2/20/98)	Forest City (3/31/95)
Beech Hill Pond (3/1/90)	Freeport (2/20/98)
Belgrade (2/20/98)	Gardiner (2/20/98)
Biddeford (5/31/95)	Grand Lake Stream (3/31/95)
Biddeford Pool (10/29/98)	Great Wass Island (10/1/99)
Big Lake (2/20/98)	Greenbush (2/20/98)
Bog Lake (3/1/91)	Hadley Lake (3/31/95)
Bois Bubert (2/20/98)	Hampden (3/31/95)
Boothbay Harbor (10/1/99)	Hancock (2/20/98)
Bottle Lake (2/20/98)	Harmony (3/31/95)
Brandy Pond (2/20/98)	Harrington (10/1/99)
Brassua Lake West (3/1/91)	Harrington Lake (2/20/98)
Bristol (5/23/94)	Hewett Island (2/20/98)
Brooklin (3/1/90)	Howland (5/23/94)
Brookton (3/1/90)	Indian Pond North (3/31/95)
Brunswick (3/31/95)	Isle Au Haut East (10/1/99)
Bucksport (2/20/98)	Isle Au Haut West (10/1/99)
Burlington (3/1/91)	Islesboro (2/20/98)
Burnham (3/1/93)	Johns Island (10/1/99)
Calais (10/1/99)	Jonesport (10/1/99)
Cape Elizabeth (10/1/99)	Kelleyland (3/1/93)
Cape Rosier (2/20/98)	La Pomkeag Lake (10/1/99)
Caribou Lake South (3/1/90)	Lambert Lake (10/1/99)
Caucomgomoc Lake East (10/1/99)	Leadbetter Island (2/20/98)
Caucomgomoc Lake West (2/20/98)	Lee (3/1/93)
Center Lovell (3/31/95)	Lily Bay (2/20/98)
Cherryfield (3/1/90)	Lincoln Center (3/1/92)
Chesuncook (3/1/91)	Lincoln West (2/20/98)
Churchill Lake (2/20/98)	Long Lake (2/20/98)
Clifford Lake (2/20/98)	Louds Island (2/20/98)
Cross Island (2/20/98)	Lubec (2/20/98)
Cutler (2/20/98)	Machias (10/1/99)
Damariscotta (2/20/98)	Machias Bay (2/20/98)
Danforth (3/1/93)	Matinicus (3/1/93)
Dark Cove Mountain (3/31/95)	Mattamiscontis Mtn. (3/1/90)
Deer Isle (3/31/95)	Mattaseunk Lake (2/20/98)
Devils Head (10/1/99)	Mattawamkeag (2/20/98)
Dexter (10/1/99)	Mattawamkeag Lake (2/20/98)
Drisko Island (2/20/98)	Meddybemps Lake East (2/20/98)

¹Effective dates may change as maps are updated. The effective date for an individual Essential Habitat map can be found on the legend of full-size maps or in the margin on reduced-size copies. Any map with an effective date prior to what is noted for it in the above list, is no longer current and should be discarded.

Millinocket (10/1/99)
Molasses Pond (10/1/99)
Mt. Waldo (10/1/99)
New Harbor (3/1/93)
Newbury Neck (5/23/94)
Nine Meadow Ridge (2/20/98)
Nollesemic Lake (10/1/99)
Norcross (2/20/98)
